Monthly Market Update by JM Financial Mutual Fund

Details as on June 29, 2012

Market Update - Equity

ECONOMY

For the month of April 2012, IIP stood at 0.1% as against market expectations of 1.8%. This was the third consecutive month when it was below expectations and has become a cause for concern. The near flat growth in April was dragged by the contraction in Capital Goods and Intermediate Goods, while Consumer Goods saw a recovery over the previous month.

WPI inflation for May rose to 7.6% vs 7.2% last month. Inflation trend is expected to remain elevated on the back of the hike in Minimum Support Prices (MSPs). RBI's decision to leave the key rates and the CRR unchanged did not go down well with the markets. The street was expecting a 25bps cut in the repo rate following the weak growth trends - but RBI decided to hold back any further loosening. Rupee continued to weaken in June and surpassed 57 to the USD for the first time.

STOCK MARKET

June had Indian equities providing relief even as the bearish mood among investors continued to persist. While equities shot up due to Greek re-election results globally, Indian macro performance continued to disappoint and weak monsoon only compounded the woes. Indian equities recorded a positive performance (7.2%) on the back of global risk-on trade. India, however continued to face domestic headwinds and even though equities were stubborn, the rupee saw new lows in June.

In July, the market will be hoping to see at least some positive steps being taken to redress the macro situation, while at the same time rooting for the government to clear some of the backlog on pending decisions. PM taking over the Finance ministry has significantly raised expectations of government action to boost the economy.

FII's came in with investments in the block deals in the month of June - taking their net buying for the month to \$575mn. FII YTD net buy has now totalled \$9.1bn. DIIs net buying stood at \$219mn in June. YTD, however, they still remained net sellers to the tune of \$3.7bn. Within the DIIs, Mutual Funds and Insurance companies both emerged as net buyers last month, bringing in \$88mn and \$131mn respectively.

Market Update - Derivatives

The June expiry level was around 4.5% higher than that of May. The market wide rollovers stood at ~77%. The rollovers were on the higher side as compared to ~71% rollovers seen last expiry. The July series started with market wide future open interest of ~INR 373bn as against ~INR 311bn seen at the start of the June expiry. Nifty rollovers picked up on the last day with ~68% positions getting shifted to the July series compared to ~59% rollovers seen in the last series. Stock Futures rolls were 4% higher than the three month avg. of 77%. Technology & Financial names saw higher rollover activity in June series as compared to their three month average. Volatility in the markets may help to churn the arbitrage portfolio and generate good returns.
