LEVY OF STAMP DUTY ON ALLOTMENT*

Mutual fund units issued against Purchase transactions (whether through lump-sum investments or SIP or STP or switchins or reinvestment under IDCW Option) would be subject to levy of stamp duty @ 0.005% of the amount invested. The rate and levy of stamp duty may vary as amended from time to time.

* Pursuant to Notification No. S.O. 4419(E) dated December 10, 2019 issued by Department of Revenue, Ministry of Finance, Government of India, read with Part I of Chapter IV of Notification dated February 21, 2019 issued by Legislative Department, Ministry of Law and Justice, Government of India on the Finance Act, 2019, and subsequent Notification dated March 30, 2020 issued by Department of Revenue, Ministry of Finance, Government of India.

The stamp duty will be deducted from the net investment amount i.e. gross investment amount less any other deduction like transaction charge. Units will be created only for the balance amount i.e. net investment amount as reduced by the stamp duty. The stamp duty will be computed at the rate of 0.005% on an inclusive method basis as illustrated below:

For instance: If the investment amount is Rs. 100,100 and the transaction charge is Rs. 100, the stamp duty will be calculated as follows: ((Investment Amount - Transaction Charge) / 100.005) *0.005 = Rs. 5. If the applicable Net Asset Value (NAV) is Rs. 10 per unit, then units allotted will be calculated as follows: (Investment Amount - Transaction Charge - Stamp Duty)/ Applicable NAV = 9,999.50 units.

A. RISK FACTORS

Standard Risk Factors:

- Mutual funds and securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Fund will be achieved.
- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of 1 Lac made by it towards setting up the Fund.
- The Scheme under this Scheme Information Document is not guaranteed or assured return scheme.

SCHEME SPECIFIC RISK FACTORS

Apart from the risk factors mentioned above, the investors in JM Focused Fund should note that the Scheme is designed for investment concentrated portfolio of 30 stocks and as such the performance of these stocks would have a direct bearing on the performance of Scheme. Unitholders should also note that as there will be concentration of investments, the Scheme carries the risk of much lesser diversification. Therefore, the NAV of this Scheme would be dependent upon the performance and market price movement of such companies in the Scheme and will be more volatile compared to the NAV of a scheme with more diversified portfolio.

(i) RISK FACTORS ASSOCIATED WITH INVESTING IN EQUITIES AND EQUITY RELATED INSTRUMENTS

Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments in equity and equity related securities. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of sale proceeds. The NAVs of the units of the Scheme can go up or down because of various factors that affect the capital markets in general. Macroeconomic factors like changes in tax rates, political uncertainties, changes in government regulations etc. and industry specific factors like competition, demand supply, etc. could impact the performance of the companies in which the Scheme invests.

(ii) RISK RELATED TO INVESTING IN DEBT / BONDS / MONEY MARKET INSTRUMENTS / UNITS OF LIQUID / MONEY MARKET / DEBT MUTUAL FUND SCHEMES:

a) Interest Rate Risk

As with all debt securities, changes in interest rates will affect the NAVs of the Scheme as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long term securities generally fluctuate more in response to interest rate changes than of shorter-term securities. Interest rate movements in the Indian debt markets can be volatile leading to the possibility of large price movements up or down in debt and money market securities and thereby to possibly large movements in the NAV.

b) Liquidity or Marketability Risk

This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of some of these investments. Different segments of the Indian financial markets have different settlement periods, and such periods may be extended significantly by unforeseen circumstances. The length of time for settlement may affect the Scheme in the event it has to meet an inordinately large number of redemption or of restructuring of the Scheme's investment portfolio.

c) Credit Risk

Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security). Because of this risk, debentures are sold at a yield spread above those offered on treasury securities which are sovereign obligations and generally considered to be free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the actual changes in the perceived level of credit risk as well as the actual event of default.

d) Reinvestment Risk:

This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme or from maturities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested will fall.

(iii) RISKS ASSOCIATED WITH STOCK LENDING

In case the Scheme undertakes stock lending under the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

(vi) REDEMPTION RISK

As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or a restructuring of the Scheme.

(v) RISK RELATING TO DERIVATIVES

i. The Scheme may use various derivative products as permitted by the Regulations. In the derivative markets there are risk factors and issues concerning the use of derivatives that investors should understand. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to manage the risks as a result of the failure of the counterparty to comply with the terms of the derivative contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives, credit risk where the danger is that of a counterparty failing to honour its commitment, liquidity risk where the danger is that the derivatives cannot be sold at prices that reflect the underlying assets, rates and indices and price risk where the market price may move in adverse fashion.

ii. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

- **Credit Risk:** The credit risk in derivative transaction is the risk that the counter party will default on its obligations and is generally low, as there is no exchange of principal amounts in a derivative transaction.
- **Market Risk:** Market movements may adversely affect the pricing and settlement derivatives.
- **Illiquidity Risk:** This is the risk that a derivative cannot be sold or purchased quickly enough at a fair price, due to lack of liquidity in the market.

(vi) RISK FACTORS ASSOCIATED WITH PROCESSING OF TRANSACTION THROUGH STOCK EXCHANGE MECHANISM:

The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE, on any Business Day will depend upon the modalities of processing viz. collection of application form, KYC documentation, order processing/ settlement, etc. upon which the Fund has no control. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s).

(vii) Risk related to ADRs/GDRs

The Scheme may also invest in ADRs / GDRs as permitted by Reserve Bank of India and Securities and Exchange Board of India. To the extent that some part of the assets of the Plans may be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by the changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital also may be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.

(Viii) Risk Factors associated with Investments in REITs and InvITs

Liquidity Risk: This refers to the ease with which securities/instruments of REITs / InvITs can be sold. There is no assurance that an active secondary market will develop or be maintained. Hence, there could be times when trading in the units is infrequent. The subsequent valuation of illiquid units may reflect a discount from the market price of comparable securities/instruments for which a liquid market exists. As these products are new to the market they are likely to be exposed to liquidity risk.

Reinvestment Risk: Investments in securities/instruments of REITs and InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.

Price Risk: Securities/Instruments of REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. The extent of fall or rise in the prices depends upon factors such as general market conditions, factors and forces affecting capital market, real estate and infrastructure sectors, level of interest rates, trading volumes, settlement periods and transfer procedures.

Interest Rate Risk: Securities/Instruments of REITs and InvITs run interest rate risk. Generally, when interest rates rise, prices of units fall and when interest rates drop, such prices increase.

Credit Risk: Credit risk means that the issuer of a REIT/InvIT security / instrument may default on interest payment or even on paying back the principal amount on maturity. Securities / Instruments of REITs and InvITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre-scheduled.

Regulatory/Legal Risk: REITs and InvITs being new asset classes, rights of unit holders such as right to information etc. may differ from existing capital market asset classes under Indian Law.

(ix) Risks associated with segregated portfolio

- Unit holders holding units of segregated portfolio may not be able to liquidate their holdings till recovery of money from the issuer.
- Security in the segregated portfolio may not realize any value.
- Listing of any units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further, trading price of units on the stock market may be significantly lower than the prevailing NAV.

(x) Risk Factors associated with Exchange Traded Funds

a) **Absence of Prior Active Market:** Although the units of ETFs are listed on the Stock Exchange for trading, there can be no assurance that an active secondary market will develop or be maintained.

b) **Lack of Market Liquidity:** Trading in units of ETFs on the Stock Exchange on which it is listed may be halted because of market conditions or for reasons that, in the view of the concerned Stock Exchange or Market Regulator, trading in the ETF Units is inadvisable. In addition, trading in the units of ETFs is subject to trading halts caused by extraordinary market volatility pursuant to 'circuit breaker' rules. There can be no assurance that the requirements of the concerned Stock Exchange necessary to maintain the listing of the units of ETFs will continue to be met or will remain un-changed.

c) **Units of Exchange Traded Funds May Trade at Prices Other than NAV:** The NAV of Units of Exchange Traded Funds may fluctuate with changes in the market value of a Scheme's holdings. The trading prices of units of ETF will fluctuate in accordance with changes in their NAVs as well as market supply and demand. However, given that ETFs can be created / redeemed in Creation Units, directly with the fund, large discounts or premiums to the NAVs will not sustain due to arbitrage possibility available.

ADDITIONAL RISK FACTORS:

1. INVESTMENT EXPOSURE OF THE FUND WITH REFERENCE TO SECURITISED DEBT AND RISK FACTORS SPECIFIC TO INVESTMENTS IN SECURITISED PAPERS

The Fund may invest only in those securitisation issuances which have a rating of AA and above indicating the high level of safety from credit risk point of view at the time of making an investment. The Fund will not invest in foreign securitised debt.

The Fund may invest in various type of securitisation issuances, including but not limited to Asset Backed Securitisation, Mortgage Backed Securitisation, Personal Loan Backed Securitisation, Collateralized Loan Obligation / Collateralized Bond Obligation and so on.

The Fund will conduct an independent due diligence on the cash margins, collateralisation, guarantees and other credit enhancements and the portfolio characteristic of the securitisation to ensure that the issuance fits in to the overall objective of the investment in high investment grade offerings irrespective of underlying asset class.

Types of securitised debt vary and carry different levels and types of risks. Credit risk on securitised bonds depends upon the originator and varies depending on whether they are issued with recourse to originator or otherwise. Even within securitised debt, AAA rated securitised debt offers lesser risk of default than AA rated securitised debt. A structure with Recourse will have a lower credit risk than a structure without recourse.

Risk analysis on underlying asset classes in securitisation

Generally the following asset classes for securitisation are available in India :

a. Commercial Vehicles
b. Auto and Two wheeler pools
c. Mortgage pools (residential housing loans)
d. Personal Loan, credit card and other retail loans
e. Corporate loans/receivables

Underlying assets in securitised debt may assume different forms and the general types of receivables include auto finance, credit cards, home loans or any such receipts. Credit risks relating to these types of receivables depend upon various factors including macro economic factors of these industries and economies. Specific factors like nature and adequacy of property mortgaged against these borrowings, nature of loan agreement / mortgage deed in case of home loan, adequacy of documentation in case of auto finance and home loans, capacity of borrower to meet its obligation on borrowings in case of credit cards and intentions of the borrower influence the risks relating to the asset borrowings underlying the securitised debt.

Holders of the securitised assets may have low credit risk with diversified retail base on underlying assets especially when securitised assets are created by high credit rated tranches. Risk profiles of Planned Amortisation Class tranches (PAC), Principal Only Class Tranches (PO) and Interest Only class tranches (IO) will differ depending upon the interest rate movement and speed of prepayment.

In terms of specific risks attached to securitisation, each asset class would have different underlying risks, however, residential mortgages are supposed to be having lower default rates as an asset class. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is fairly easier and better compared to mortgages. Some of the asset classes such as personal loans, credit card receivables, etc., being unsecured credits in nature, may witness higher default rates. As regards corporate loans/receivables, depending upon the nature of the underlying security for the loan or the nature of the receivable the risks would correspondingly fluctuate. However, the credit enhancement stipulated by rating agencies for such asset class pools is typically much higher and hence their overall risks are comparable to other AAA rated asset classes. The rating agencies have an elaborate system of stipulating margins, over collateralisation and guarantees to bring risk limits in line with the other AA rated securities.

The risks associated with the underlying assets can be described as under :

Credit card receivables are unsecured. Automobile / vehicle loan receivables are usually secured by the underlying automobile / vehicle and sometimes by a guarantor. Mortgages are secured by the underlying property. Personal loans are usually unsecured.

Corporate loans could be unsecured or secured by a charge on fixed assets / receivables of the company or a letter of comfort from the parent company or a guarantee from a bank / financial institution. As a rule of thumb, underlying assets which are secured by a physical asset / guarantor are perceived to be less risky than those which are unsecured. By virtue of this, the risk and therefore the yield in descending order of magnitude would be credit card receivables, personal loans, vehicle / automobile loans, mortgages and corporate loans assuming the same rating.

Some of the factors, which are typically analyzed for any pool are as follows :

Size of the loan: generally indicates the kind of assets financed with loans. Also indicates whether there is excessive reliance on very small ticket size, which may result in difficult and costly recoveries. To illustrate, the ticket size of housing loans is generally higher than that of personal loans. Hence in the construction of a housing loan asset pool for say Rs.10,000,000/- it may be easier to construct a pool with just 10 housing loans of Rs.1,000,000 each rather than to construct a pool of personal loans as the ticket size of personal loans may rarely exceed Rs.500,000/- per individual. Also to take this illustration further, if one were to construct a pool of Rs.10,000,000/- consisting of personal loans of Rs.100,000/- each, the larger number of contracts (100 as against one of 10 housing loans of Rs.10 lakh each) automatically diversifies the risk profile of the pool as compared to a housing loan based asset pool.

Average original maturity of the pool: indicates the original repayment period and whether the loan tenors are in line with industry averages and borrower's repayment capacity. To illustrate, in a car pool consisting of 60-month contracts, the original maturity and the residual maturity of the pool viz. number of remaining installments to be paid gives a better idea of the risk of default of the pool itself. If in a pool of 100 car loans having original maturity of 60 months, if more than 70% of the contracts have paid more than 50% of the installments and if no default has been observed in such contracts, this is a far superior portfolio than a similar car loan pool where 80% of the contracts have not even crossed 5 installments.

Loan to Value ("LTV") Ratio: Indicates how much % value of the asset is financed by borrower's own equity. The lower the LTV ratio, the better it is. This ratio stems from the principle that where the borrower's own contribution of the asset cost is high, the chances of default are lower. To illustrate for a vehicle costing Rs. 50 lakhs, if the borrower has himself contributed Rs. 40 lakhs and has taken only Rs.1 0 lakhs as a loan, he is going to have lesser propensity to default as he would lose an asset worth Rs. 50 lakhs if he defaults in repaying an installment. This is as against a borrower who may meet only Rs. 5 lakhs out of his own equity for a vehicle costing Rs. 50 lakhs. Between the two scenarios given above, the latter would have higher risk of default than the former.

Average seasoning of the pool: Indicates whether borrowers have already displayed repayment discipline. To illustrate, in the case of a personal loan, if a pool of assets consists of those who have already repaid 80% of the installments without default, this certainly is a superior asset pool than the one where only 10% of the installments have been paid. In the former case, the portfolio has already demonstrated that the repayment discipline is far higher.

Default rate distribution: Indicates how much % of the pool and overall portfolio of the originator is current, how much is in 0-30 DPD (days past due), 30-60 DPD, 60-90 DPD and so on. The rationale here is very obvious - as against 0-30 DPD, the 60-90 DPD is certainly a higher risk category.

Unlike in plain vanilla instruments, in securitisation transactions, it is possible to work towards a target credit rating, which could be much higher than the originator's own credit rating. This is possible through a mechanism called "Credit enhancement" and is fulfilled by filtering the underlying asset classes and applying selection criteria, which further diminishes the risk inherent for a particular asset class. The purpose of credit enhancement is to ensure timely payment to the investors, if the actual collections from the pool of receivables for a given period are short of the contractual payouts on securitisation. Securitisation is normally a non-recourse instrument and therefore, the repayment on securitisation would have to come from the underlying assets and the credit enhancement. Therefore, the rating criteria centrally focuses on the quality of the underlying assets.

World over, the quality of credit ratings is measured by default rates and stability. An analysis of rating transition and default rates, witnessed in both international and domestic arena, clearly reveals that structured finance ratings have been characterized by far lower default and transition rates than that of plain vanilla debt ratings. Further, internationally, in case of structured finance ratings, not only are the default rates low but post default recovery is also high.

In the Indian scenario, also, more than 95% of issuances have been AAA rated issuances indicating the strength of the underlying assets as well as adequacy of credit enhancement.

Interest Rate Risk

The change in market interest rates – prepayments may not change the absolute amount of receivables for the investors, but may have an impact on the re-investment of the periodic cash flows that the investor receives in the securitised paper.

Limited liquidity & price risk

Presently, secondary market for securitised papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. This could limit the ability of the investor to resell them. Even if a secondary market develops and sales were to take place, these secondary transactions may be at a discount to the initial issue price due to changes in the interest rate structure.

Limited recourse, delinquency and credit risk

Securitised transactions are normally backed by pool of receivables and credit enhancement as stipulated by the rating agency, which differ from issue to issue. The credit enhancement stipulated represents a limited loss cover to the Investors. These certificates represent an undivided beneficial interest in the underlying receivables and there is no obligation of either the Issuer or the Seller or the originator, or the parent or any associate of the seller, issuer and originator. No financial recourse is available to the certificate holders against the investors' representative. Delinquencies and credit losses may cause depletion of the amount available under the credit enhancement and thereby the investor payouts may get affected if the amount available in the credit enhancement facility is not enough to cover the shortfall. On persistent default of an obligor to repay his obligation, the servicer may repossess and sell the underlying asset. However many factors may affect, delay or prevent the repossession of such asset or the length of time required to realize the sale proceeds on such sales. In addition, the price at which such asset may be sold may be lower than the amount due from that obligor.

Risks due to possible prepayments: Weighted Tenor / Yield

Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. Full prepayment of underlying loan contract may arise under any of the following circumstances:

- Obligor pays the receivable due from him at any time prior to the scheduled maturity date of that receivable; or
- Receivable is required to be repurchased by the seller consequent to its inability to rectify a material misrepresentation with respect to that receivable; or
- The servicer recognizing a contract as a defaulted contract and hence repossessing the underlying asset and selling the same; or
- In the event of prepayments, investors may be exposed to changes in tenor and yield.

Bankruptcy of the originator or seller

If originator becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the sale from originator to Trust was not a sale then an investor could experience losses or delays in the payments due. All possible care is generally taken in structuring the transaction so as to minimize the risk of the sale to Trust not being construed as a "True Sale". Legal opinion is normally obtained to the effect that the assignment of Receivables to Trust in trust for and for the benefit of the Investors, as envisaged herein, would constitute a true sale.

Bankruptcy of the investor's agent

If an investor's agent becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the recourse of investor's agent to the assets/receivables is not in its capacity as agent/ Trustee but in its personal capacity, then an investor could experience losses or delays in the payments due under the swap agreement. All possible care is normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets/receivables if and when held by investor's agent is held as agent and in Trust for the investors and shall not form part of the personal assets of investor's agent. Legal opinion is normally obtained to the effect that the investor's agent's recourse to assets/receivables is restricted in its capacity as agent and Trustee and not in its personal capacity.

Credit Rating of the Transaction / Certificate

The credit rating is not a recommendation to purchase, hold or sell the certificate in as much as the ratings do not comment on the market price of the certificate or its suitability to a particular investor.

There is no assurance by the rating agency either that the rating will remain at the same level for any given period of time or that the rating will not be lowered or withdrawn entirely by the rating agency.

Risk of Co-mingling

The servicers normally deposit all payments received from the obligors into the collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the Loan Agreements may not be segregated from other funds of the servicer. If the servicer fails to remit such funds due to investors, the investors may be exposed to a potential loss.

Risks due to possible prepayments and Charge Offs

In the event of prepayments, investors may be exposed to changes in tenor and yield. Also, any Charge Offs would result in the reduction in the tenor of the Pass Through Certificates (PTCs).

Bankruptcy of the Swap Bank

If the Swap Bank, becomes subject to bankruptcy proceedings then an Investor could experience losses or delays in the payments due under the Interest Rate Swap Agreement.

Techniques Risk:

The Scheme may use techniques (including derivatives, futures and options, warrants, etc.) and instruments that may be permitted and/or that may become permissible under SEBI/RBI Regulations and/or Regulations and/or statutory modification or re-enactment thereof for efficient portfolio management and to attempt to hedge or reduce the risk of such fluctuation. However, these techniques and instruments, if imperfectly used, have the risk of the scheme incurring losses due to mismatches particularly in a volatile market. The Fund's ability to use these techniques may be limited by market conditions, regulatory limits and tax considerations (if any). The use of these techniques is dependent on the ability to predict movements in the prices of securities being hedged and movements in interest rates. There exists an imperfect correlation between the hedging instruments and the securities or market sectors being hedged. Besides, the fact that skills needed to use these instruments are different from those needed to select the Fund's/Scheme's securities. There is a possible absence of a liquid market for any particular instrument at any particular time even though the futures and options may be bought and sold on an organized stock exchange. The use of these techniques involves possible impediments to effective portfolio management or the ability to meet repurchase/redemption requests or other short-term obligations because of the percentage of the Scheme's assets segregated to cover its obligations.

Liquidity and Settlement Risks:

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. From time to time, the Scheme will invest in certain securities of certain companies, industries, sectors etc. based on certain investment parameters as adopted internally by AMC. While at all times the Trustees and the AMC will endeavor that excessive holding/investment in certain securities of industries, sectors, etc. by the Scheme be avoided, the assets invested by the Scheme in certain securities of industries, sectors, etc. may acquire a substantial portion of the Scheme's investment portfolio and collectively may constitute a risk associated with non-diversification and thus could affect the value of investments. The Scheme may have difficulty in disposing of certain securities because the security may be unlisted, due to greater price fluctuations there may be a thin trading market, different settlement periods and transfer procedures for a particular security at any given time. Settlement, if accomplished through physical delivery of stock certificates, is labour and paper intensive and may affect the liquidity. It should be noted that the Fund bears the risk of purchasing fraudulent or tainted papers. The secondary market for money market/debt securities does exist, but is generally not as liquid as the secondary market for other securities. Reduced liquidity in the secondary market may have an adverse impact on market price and the Scheme's ability to dispose of particular securities, when necessary, to meet the Scheme's liquidity needs or in response to a specific economic event, such as the deterioration in the creditworthiness of the issuer, etc. or during restructuring of the Scheme's investment portfolio. Furthermore, from time to time, the AMC, the Custodian, the Registrar, any Associate, any distributor, dealer, any company, corporate body, trust, any scheme/Mutual Fund managed by the AMC or by any other AMC may invest in the Scheme. While at all times the Trustees and the AMC will endeavor that excessive holding of Units in the Scheme among a few unit holders is avoided, however, the amounts invested by these aforesaid persons may acquire a substantial portion of the Scheme's outstanding Units and collectively may constitute a majority unit holder in the Scheme. Accordingly, redemption of Units held by such persons may have an adverse impact on the value of the redemption and may impact the ability of the unit holders to redeem their respective Units.

B. RISK MITIGATION MEASURES FOLLOWED:

Risk management is an integral part of the investment process. In line with SEBI Circular No. SEBI/HO/IMD/DF2/CIR/P/2016/42 dated March 18, 2016 and SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2019/104 dated October 01, 2019, the AMC has incorporated adequate safeguards for controlling risks in the portfolio construction process, which would be periodically evaluated. Online monitoring of various exposure limits are done by the Front Office System. The system incorporates all the investment restrictions as per SEBI guidelines and 'soft' warning alerts at appropriate levels for preemptive monitoring. The system also enables identifying & measuring the risk through various risk measurement tools and analyzes the same so as to act in a preventive manner. In addition to minimize the major risks for equity schemes, the following steps are taken:

1. **Market Risk / Volatility Risk** – Risk of adverse price movements in the portfolio

   The portfolio would be adequately diversified to mitigate volatility depending on its respective mandate. Volatility would be monitored with respect to the benchmark and peer set.

2. **Liquidity Risk** – Risk if liquidity impact of entering/exiting the underlying stocks in the portfolio.

   Depending on the mandate of JM Focused Fund, some part of the scheme is invested in large cap stocks which are actively traded and thereby liquid. The fund manager may also keep some portion of the portfolio in debt and money market instruments and/or cash within the specified asset allocation framework for the purpose of meeting redemptions. The overall liquidity of the schemes are monitored periodically and necessary action taken on the portfolios, if required. The debt/money market instruments that are invested by the fund also have a short term duration.

DIRECT PLAN

A. Direct Plan

In accordance with Para D titled "Separate Option for direct investments" under Circular No. CIR/IMD/DF/21/2012 dated September 13, 2012 issued by Securities and Exchange Board of India (SEBI), JM Financial Trustee Company Private Limited, (the "Trustee" to the Mutual Fund), has introduced a separate plan for direct investments (i.e. investments not routed through an AMFI Registration Number (ARN) Holder ("Distributor") (hereinafter referred to as "Direct Plan") as under:

Direct Plan is only for investors who purchase/subscribe units in the Scheme directly with the Fund and is not available for investors who route their investments through a Distributor.

Plans / Options / Sub-options:

All Plans / Options / Sub-Options being offered under the Scheme ("Regular Plan") will also be available for subscription under the Direct Plan. Thus, there shall be 2 Plans available for subscription under the Scheme viz., Regular Plan and Direct Plan. Portfolio of the Scheme under the Regular Plan and Direct Plan will be common.

The provisions pertaining to Minimum Subscription Criteria, Load and Additional Purchases will be applicable at Scheme (Portfolio) Level.

Scheme characteristics:

Scheme characteristics such as Investment Objective, Asset Allocation Pattern, Investment Strategy, risk factors, facilities offered and terms and conditions including load structure will be the same for the Regular Plan and the Direct Plan, except that:

- No exit load shall be charged for any switch of investments between Regular Plan and Direct Plan within the same Scheme. The applicable exit load, if any, will be charged for redemptions/ switch outs of the Scheme (i.e. at portfolio level) before the completion of the stipulated load/ lock-in period. The stipulated load/ lock-in period will be reckoned from the date of allotment of units for a particular transaction in the Scheme (i.e. at portfolio level) till the date of redemption / switch out from that scheme, irrespective of the number of intra-scheme switches by the investor between the aforementioned two dates (e.g. switches between plans/sub-plans/options/sub-options within the Scheme having the same portfolio)
- The extant provisions of applicability of load on redemptions/ switches from one Scheme to another will continue to be applicable.

Direct Plan shall have a lower expense ratio excluding distribution expenses, commission, etc and no commission for distribution of Units will be paid / charged under Direct Plan.

Applicable NAV and allotment of units:

The provisions of applicability of NAV and allotment of units will be same for Regular and Direct plan.

Eligible investors / modes for applying: All categories of investors (whether existing or new Unitholders), as permitted under the SID of the Scheme, are eligible to subscribe under Direct Plan. Investments under Direct Plan can be made through various modes offered by the Fund for investing directly with the Fund and all other Platform(s) where investors' applications for subscription of units are routed through SEBI registered Investment Advisors.

How to apply:

Investors subscribing under Direct Plan of the Scheme will have to indicate "Direct Plan" against the Scheme name in the application form/ transaction slip e.g. "JM Focused Fund (Direct)".

However, in the event of the Investor having failed to mention the plan clearly, the following Default Plan will be captured for the investment under the scheme.

Investors may also indicate "Direct" in the ARN column of the application form/ transaction slip. However, in case Distributor/ Sub- broker code is mentioned in the application form, but "Direct Plan" is indicated against the Scheme name or in any other place or in any manner whatsoever in the Application Form/ transaction slip, the Distributor/ Sub-broker code will be ignored and the application will be processed under Direct Plan.

Further, where application is received for Regular Plan without Distributor code or "Direct" is mentioned in the ARN Column, the application will be processed under the Direct Plan.

Redemption requests: Where Units under the Scheme are held under both Regular and Direct Plans and the redemption / Switch request pertains to the Direct Plan, the same must clearly be mentioned on the request (along with the folio number).

In the event of the investor not clearly mentioning the name of the Plan (Regular or Direct)/ Option/ Sub-option/or wherever there is an ambiguity in choice of Plan (Regular or Direct)/ Option/ Sub-option opted for in the request for redemption/switch-out of all/specified amount/units, in the absence of clarificatory letter from the investor on the day of the transaction, the AMC/ Registrar reserves the right to process the redemption/switch out request from the Regular Plan or Direct Plan if such redemption request can be processed in totality. In such case, the redemption will first be effected from the Regular Plan.

E.g. If an investor has investment of Rs. 5 lakh in an Regular Plan and Rs. 10 lakh in the Direct Plan and a redemption request is received from him for redemption of Rs. 2 lakh without indicating which Plan the redemption is to be effected from, the AMC/ Registrar will effect the redemption from the Regular Plan. In the same example, if the redemption request was for Rs. 7 lakh, the redemption would be effected from the Direct Plan.

However, in case it is not possible to effect the redemption from any one of the Plans in totality i.e. either from the Regular or from the Direct Plan, such redemption request will be treated as void ab-initio and rejected.

E.g. If the redemption request in the above example is for Rs. 12 lakh, the AMC / Registrar will summarily reject the redemption request. Where units are held under any one i.e. under Regular or Direct Plan, the redemption will be processed from such Plan.

Tax consequences: Switch / redemption may entail tax consequences. Investors should refer to the tax paras set out elsewhere in the document as well as consult their professional tax advisor before initiating such requests.

Exchange Platforms:

SEBI vide its Circular No. SEBI/IMD/CIR No. 11/183204/2209 dated November 13, 2009 had facilitated transactions in Mutual Fund schemes through the stock exchanges infrastructure. Also, vide Circular No. CIR/ IMD/DF/17/2010 dated November 09, 2010, SEBI had permitted routing of Mutual Fund transactions through the clearing members of the registered stock exchanges and Depository Participants of registered Depositories. In view of this and in order to increase the network and enhance the level of service to the investors of JM Financial Mutual Fund, the Boards of JM Financial Asset Management Limited (the "AMC") and JM Financial Trustee Company Private Limited (the "Trustees") decided to offer an alternate platform to facilitate purchase (subscription) and redemption (repurchase) of units of all the eligible schemes of the Fund. This facility is offered in terms of the aforesaid SEBI circular and the guidelines issued by National Stock Exchange of India Ltd. (NSE) and BSE Ltd. (BSE) in this regard.

Following are the exchange platforms through which investors can subscribe/ redeem the units of certain schemes:

1. Mutual Fund Service System (MFSS) introduced by NSE.
2. NSE Mutual Fund Platform II (NMF- II)

1. Features of the MFSS introduced by NSE:

MFSS is an online order collection system provided by NSE to its eligible members for placing subscription or redemption orders on the MFSS, based on orders received from the investors.

MFSS has been designed to provide a confirmation slip of the order(s) entered, which would be deemed to be the time of receipt of application for the purpose of determining the applicability of NAV.

MFSS facility shall be subject to such operating guidelines as may be issued by NSE from time to time.

2. Features of the NSE Mutual Fund Platform II (NMF- II):

The Scheme will also be available on the other platform of NSE known as NSE Mutual Fund Platform II (NMF- II) for the following financial and all the types of non- financial transactions through demat and/or non demat mode:

- Switch transactions (Units held in the non-demat mode)
- Systematic Investment Plan (SIP)
- Systematic Withdrawal Plan (SWP)
- Systematic Transfer Plan (STP) (Units held in the non-demat mode)
- New Fund Purchase (NFO)

For Switch/ SWP/ STP etc., the investor can place request with the same Mutual Fund Distributor through whom the respective units were purchased earlier.

The facility provided by NSE Mutual Fund Platform (NMF II) can be availed by:

- Resident Investors (RIs)
- Non-Resident Investors (NRIs).
- Hindu undivided Family (HUFs).

Investment can be made through valid ARN Holder (i.e AMFI registered distributor) or through Registered Investment Advisors (RIA) holding valid SEBI registration number.

For investors who can not avail the above facility kindly refer to "Who cannot invest" under "New Fund Offer" in "Units and Offer" section in the SID.

3. Features of the BSE StAR MF introduced by BSE:

a) The trading member of BSE can facilitate investors to subscribe and redeem the mutual fund units using their existing network and order collection mechanism provided by BSE.

b) The transactions carried out on the BSE platform shall be subject to such guidelines as may be issued by BSE and also SEBI (Mutual Funds) Regulations, 1996 and circulars/guidelines issued thereunder from time to time.

1) Basic points to be noted by the investors:

i) Who can avail of this facility and is it available for all modes / options of investment?:

These platforms are authorized Point of Acceptance for the limited purpose of time-stamping the transactions.

Illustration of the calculation of sale and repurchase price of the units of the Mutual Fund:

If the applicable NAV is Rs. 10 and the exit load is 1%, then the redemption price will be: Rs. 10*(1-0.01) = Rs. 9.9000.

Investors who hold units in demat form and wish to redeem their units, kindly refer to the redemption procedure set out in the SID.

RDEMPTION PAYMENT PERIOD

There is no minimum and maximum limit on the amount/units which can be redeemed/switched-out. The investor is free to redeem any or all units outstanding in his/her/their folio.

The redemption or repurchase proceeds shall be dispatched to the unitholders within 10 business days from the date of redemption or repurchase.

Redemption/Switch Procedure in case of physical form:

The investors holding units in physical form may submit their redemption/ switch requests duly signed by all the holders (as per the mode of holding) at any of the Investor Service Centers (ISC) of Registrar & Transfer Agent viz., M/s KFin Technologies Limited or JM Financial Asset Management Ltd. latest by the cut off time as stipulated and revised by SEBI from time to time which is currently 3.00 p.m. on any business day.

Such cases will be eligible for NAV of the business day on which the redemption requests are time-stamped upto the cut-off time at the ISC for the Scheme.

Redemption / Switch Procedure in case units are held in dematerialized form:

The investors who hold units in demat form and wish to redeem their units will have to take following steps:

- Switch of demat units not permitted. In such a case, the investor has to rematerialise the units and ten submit the switch request in physical form.
- Investors will have to approach their DP (Depository Participants) where Demat Account is being held.
- Investors will have to submit duly filled-in and signed Redemption/ Repurchase Request Form (RRF) available with respective DPs. Normally, these RRF may be available on the websites of respective DPs e.g. Banks etc. As the format of RRF may be different with every DP, the investors are advised to use the RRF procured from their own DP to avoid rejections/delays by their own DP. The ISIN of the Scheme/plan/ sub-plan is printed on the Statement of Account issued to investors.
- The investors are required to submit 3 copies of RRF to their DPs. One copy of the RRF is used by the DP for issuing acknowledgement to investors whereas the second copy of the RRF will be forwarded by the DP to the Head Office of the RTA i.e M/s KFin Technologies Ltd. The third

copy will be retained by the DP for their own records.

- Based on the receipt of RRF, if found in order, the DP concerned generates Electronic Redemption Request and blocks the units applied for redemption in the NSDL/CDSL system immediately. After this, the investor will not be able to transfer the blocked units to anyone (i.e. cannot transfer to anyone).
- The Electronic Requests generated up to the stipulated cut off time which is currently 3 pm every day by DPs shall get transmitted from NSDL / CDSL to respective Registrars of Mutual Fund by 4 - 6 pm.
- All such Electronic Requests transmitted by NSDL / CDSL by 4 – 6 pm everyday are updated in the system at Registrar's end i.e. M/s KFin Technologies Ltd. for further processing.
- Registrar shall verify and process the requests subject to finding the same in order by

a) Nullifying the units by confirming Electronic Repurchase Request,

b) Applying NAV based on Date and Time of raising Electronic request by DP's for Redemption Request,

c) Remitting Redemption proceeds to investor's bank account (as recorded in demat account) within 10 business days and

d) Dispatching an SOA (Statement of Account/Consolidated Account Statement) to the registered address of investor.

- After the above process is completed, the Registrar will update the respective Depository (i.e. NSDL/ CDSL) about the processing of redemption to enable their DPs to issue Fortnightly/ Monthly Transaction Statement.

A Unit holder has in case of physical refund request the option to request for redemption either in terms of Amount or in terms of the number of Units. In case, the redemption request indicates both amount in Rupees and number of Units, the lower of the two in value term will be considered. Where a Rupee amount is specified or deemed to be specified for redemption, the number of Units redeemed will be the equivalent to the amount sought redeemed plus the exit load & applicable Govt levies like STT divided by the redemption price (ie additionally subject to the levy of applicable STT and exit load).

In case of difference/ ambiguity in the amount and units mentioned in any request for Redemption/ Switch, the minimum value (of units and amount) on rupee equivalent basis on the Transaction/ applicable NAV date will be considered by the AMC, provided the investor has not furnished any clarification in writing, duly signed on the date of transaction. In the event of investor not having filled in the Amount/ Units in the Transaction Slip, the AMC will redeem/ switch out all the outstanding units in case the Scheme, Plan, Option are clearly mentioned.

In case, the investor has not mentioned the plans/ sub-plans etc. in the redemption request specifically where he is having holdings in various plans/ sub-plans etc. of the particular scheme, AMC will summarily reject such redemption request if the investor has not furnished any clarification in writing, duly signed on the date of transaction itself, during normal office hours.

In case, an Investor fails to mention the complete name of the Scheme upto plan/ sub - plan level while making request for redemption/ switch-out, the AMC reserves the right to redeem/ switch-out all/specified desired units/ value provided the investor is having holdings only in one scheme/plan/option and the folio number is clearly mentioned or if he maintains one folio. Otherwise, such incompletely filled requests would be summarily rejected without processing.

Investors are requested to note that in case of redemption/switch request, if the number of units or the amount to be redeemed/switched out to any other Scheme of JM Financial Mutual Fund, exceeds the number of outstanding units or value of outstanding units, respectively, then JM Financial Asset Management Limited (the "AMC") shall, at its discretion, redeem/switch out all the outstanding units, if no clarificatory letter is received from the respective investor on the date of the transaction and if the condition of minimum investment amount of switch-in scheme is fulfilled.

The number of Units so redeemed will be subtracted from the Unit holder's account and a monthly industry level Mutual Fund Consolidated Account Statement (CAS) containing the details will normally be dispatched / emailed to the Unitholders latest by 15th of subsequent month by NSDL/CDSL in case of Demat Units or by AMFI's appointed Agencies (currently M/s. Manipal Technologies Ltd. or M/s. Seshaai Business Forms Pvt. Ltd.) for verified PAN cases and by the registrar (i.e. M/s. KFin Technologies Limited) for other cases either through email or physical copy.

FIFO Method of redemption/switch-out

In case, an investor has purchased Units on more than one business day, the Units purchased prior in time (i.e. those Units which have been held for the longest period of time), will be deemed to have been redeemed first, i.e. on first in first out basis. Unit holders may also request for repurchase of their entire holding and close the account by indicating the same at the appropriate place in the Transaction Slip/ Repurchase form.

Uniform process for processing of redemption/switch – out for all the Schemes of the Mutual Fund

All switch funding shall be in line with redemption funding timelines adopted by the concerned scheme i.e. if a scheme follows T+3 payout for redemption, the switch out funding will also be made on T+3 and not earlier or later than T+3, where T is the day of valid transaction received before the stipulated cut off time.

Restriction on redemption in Mutual Funds:

In terms of circular SEBI/IMD/CIR No.5/126096/08 dated May 23, 2008, provision of restriction on redemption under any scheme of the mutual fund could be made only after the approval from the Board of Directors of the Asset Management Company (AMC) and the Trustees.

Creation of Segregated portfolio

In case of a credit event at issuer level and to deal with liquidity risk, the AMC may create a segregated portfolio of debt and money market instruments including unrated or money market instruments of an issuer that does not have outstanding rated debt or money market instruments, under the Scheme in compliance with the SEBI Circular No. SEBI/HO/IMD/DF2/CIR/P/2018/160 dated December 28, 2018, read with SEBI Circular No. SEBI/HO/IMD/DF2/CIR/P/2019/127 dated November 07, 2019 ("SEBI Circular").

In this regard, the term 'segregated portfolio' shall mean a portfolio comprising of debt or money market instrument affected by a credit event, that has been segregated in a mutual fund scheme(s).

The term 'main portfolio' shall mean the scheme portfolio excluding the segregated portfolio and the term 'total portfolio' shall mean the scheme portfolio including the securities affected by the credit event i.e. main portfolio and all segregated portfolio(s).

The AMC may create a segregated portfolio in a mutual fund scheme in case of a credit event at Issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:

a) Downgrade of a debt or money market instrument to 'below investment grade', or

b) Subsequent downgrades of the said instruments from 'below investment grade', or

c) Similar such downgrades of a loan rating, or

d) Actual default of either the interest or principal amount in case of unrated debt or money market instruments.

In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events as detailed above and implemented at the ISIN level. Creation of segregated portfolio shall be optional and at the discretion of the AMC.

Further, the AMC shall seek approval of the Trustees prior to creation of the segregated portfolio.

Process for creation of segregated portfolio

The AMC shall decide on creation of segregated portfolio of the Scheme on the day of credit event. Segregation of portfolio in case of unrated debt or money market instruments will be done only in case of actual default of either the interest or principal amount by the issuer of such instruments. The AMC shall inform AMFI immediately about the actual default by the issuer.

Once the AMC decides to segregate portfolio, the AMC shall:

a) seek approval from the Board of Directors of the Trustee Company, prior to creation of the segregated portfolio.

b) immediately issue a press release disclosing its intention to segregate such debt and money market instruments and its impact on the investors of the Scheme. The AMC shall also disclose that the segregation shall be subject to Trustee approval. Additionally, the said press release shall be prominently disclosed on the website of the AMC.

c) ensure that till the time the Trustee approval is received, which in no case shall exceed 1 (one) business day from the day of credit event, the subscription and redemption in the concerned Scheme shall be suspended for processing with respect to creation of units and payment on redemptions.

Once the approval of the Trustees is received by the AMC:

a) The segregated portfolio shall be effective from the day of credit event.

b) The AMC shall issue a press release immediately with all relevant information pertaining to the segregated portfolio of the Scheme. The said information shall also be submitted to SEBI.

c) An e-mail or SMS shall be sent to all unit holders of the concerned Scheme.

d) The NAVs of both segregated and main portfolio shall be disclosed from the day of the credit event.

e) All existing investors in the Scheme as on the day of the credit event shall be allotted equal number of units in the segregated portfolio as held in the main portfolio. The AMC shall work out with the R&T viz. KFin Technologies Ltd., the mechanics of unit creation to represent the holding of segregated portfolio and the same shall appear in the account statement of the unit holders.

f) No redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in the segregated portfolio, the AMC shall enable listing of units of segregated portfolio on the recognized stock exchange within 10 business days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests.

In case the Trustees do not approve the proposal to create a segregated portfolio, the AMC shall issue a press release immediately informing investors about the same. Thereafter, the transactions shall be processed as usual at the applicable NAV.

Valuation and processing of subscriptions and redemptions:

Notwithstanding the decision to segregate the debt and money market instruments, the valuation process shall take into account the credit event and the portfolio shall be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI MF Regulations, 1996 and circular(s) issued thereunder.

All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable, will be processed as per the existing SEBI circular on applicability of NAV as under:

a) Upon receipt of Trustee approval to create a segregated portfolio -

- Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
- Investors subscribing to the Scheme will be allotted units only in the main portfolio based on its NAV.

b) In case the Trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

TER for the Segregated Portfolio:

- The AMC shall not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in the segregated portfolio.
- The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.
- The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Disclosures:

- A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio.
- Adequate disclosure of the segregated portfolio shall appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the Mutual Fund and the Scheme.
- The Net Asset Value (NAV) of the segregated portfolio shall also be declared on daily basis along with the NAV of the main portfolio.
- The information regarding number of segregated portfolios created in the Scheme shall appear prominently under the name of the Scheme at all relevant places such as SID, KIM-cum- Application Form, advertisement, AMC and AMFI websites, etc.
- The performance of the Scheme required to be disclosed at various places shall include the impact of creation of segregated portfolio and shall clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the said fall in NAV along with recovery(ies), if any, shall be disclosed as a footnote to the performance table. Such information in the scheme related documents and Scheme performance shall be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/ written-off.
- The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

Monitoring by Trustees: In order to ensure timely recovery of investments of the segregated portfolio, the Trustees shall ensure that:

- The AMC puts in sincere efforts to recover the investments of the segregated portfolio.
- Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.
- An Action Taken Report (ATR) on the efforts made by the AMC to recover the investments of the segregated portfolio is placed in every Trustee meeting till the investments are fully recovered/ written-off.
- The Trustees shall monitor the compliance of the above mentioned SEBI circular and disclose in the half-yearly trustee reports filed with SEBI, the

compliance in respect of every segregated portfolio created.

In order to avoid mis-use of segregated portfolio, the Trustees shall have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officer (CIO), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the Scheme.

Example of Segregated Portfolio: The below table shows how a security affected by a credit event will be segregated and its impact on investors. Whether the distressed security is held in the original portfolio or the segregated portfolio, the value of the investors' holdings will remain the same on the date of the credit event.

Key assumptions: Let us assume a Scheme consists of 4 Securities (A, B, C and D). It has two investors with total of 10,000 units (Investor 1 with 7,000 units, Investor 2 with 3,000 units).

Total Portfolio Value of Rs. 40 Lakhs (Each Security invested Rs. 10 Lakh).

Current NAV: 40,00,000/10,000 = Rs. 400 Per Unit.

Suppose Security A is downgraded to below investment grade and consequently the value of the security falls from Rs. 10,00,000 to Rs. 4,00,000 and the AMC decides to segregate the security into a new portfolio, then the Investors will be allotted the same number of units in the segregated portfolio as they hold in the main portfolio. So, Investor 1 will get 7,000 Units and Investor 2 will get 3,000 units in the segregated portfolio.

With Segregation, the Portfolio Value is Rs. 34,00,000 (Now B, C and D Securities worth Rs. 30 Lakh and Security A has fallen from Rs. 10,00,000 to Rs. 4,00,000).

	Main Portfolio (Security of B, C & D)	**Segregated Portfolio (Security A)**
Net Assets	Rs. 30,00,000	Rs. 4,00,000
Number of Units	10,000	10,000
NAV per Unit	Rs. 30,00,000/10,000 = Rs. 300	Rs. 4,00,000/ 10,000= Rs. 40

With respect to Investors:

	Particulars	**Investor 1**	**Investor 2**
A	Units held in Main portfolio (No. of Units)	7,000	3,000
	NAV of Main Portfolio	Rs. 300 per Unit	Rs. 300 per Unit
	Value of Holding in Main Portfolio (Rs.)	**21,00,000**	**9,00,000**
B	Units Held in Segregated Portfolio	7,000	3,000
	NAV of Segregated Portfolio	Rs. 40 Per unit	Rs. 40 Per unit
	Value of Holding in Segregated Portfolio (Rs.)	**2,80,000**	**1,20,000**
C	**Total Value of Holdings (A) + (B) (Rs.)**	**23,80,000**	**10,20,000**

Value of the Portfolio would be as follows at different stages/ scenarios:

	Stage /Scenario	**Portfolio**	**Value**
I	Before Credit Event	Security A	Rs. 10,00,000
		Security B	Rs. 10,00,000
		Security C	Rs. 10,00,000
		Security D	Rs. 10,00,000
		Total Portfolio Value (Security A, B, C & D)	**Rs. 40,00,000**
II	On Credit Event if Portfolio is not Segregated	Security A	Rs. 4,00,000
		Security B	Rs. 10,00,000
		Security C	Rs. 10,00,000
		Security D	Rs. 10,00,000
		Total Portfolio Value (Security A, B, C & D)	**Rs. 34,00,000**
III	On Credit Event if Portfolio is segregated	**Main Portfolio:**	
		Security B	Rs. 10,00,000
		Security C	Rs. 10,00,000
		Security D	Rs. 10,00,000
		Segregated Portfolio:	
		Security A	Rs. 4,00,000
		Total Portfolio Value (Security A, B, C & D)	**Rs. 34,00,000**

Investors may note the essential difference between a segregated portfolio and non-segregated portfolio as follows:

- Where the portfolio is not segregated, the transactions will continue to be processed at NAV based prices of the total portfolio. There will be no change in the number of units remaining outstanding.
- Where the portfolio is segregated, equal number of units are created and allotted to reflect the holding for the portion of portfolio that is segregated.
- Once the portfolio is segregated, the transactions will be processed at NAV based prices of main portfolio
- Since the portfolio is segregated for distressed security, the additional units that are allotted cannot be redeemed. The units will be listed on the recognised stock exchange to facilitate exit to unit holders.
- Upon realisation of proceeds under the distressed security either in part or full, the proceeds will be paid accordingly. Based on the circumstances and developments, the AMC may decide to write off the residual value of the segregated portfolio.

Special Products / facilities available:

Systematic Investment Plans (SIPs)/Systematic Transfer Plan (STP)/ Systematic Withdrawal Plan (SWP). For further details, kindly refer to the details mentioned in the Scheme Information Document of this Scheme.

Switching Options: Unitholders under the Scheme have the option to switch part or all of their unit holdings in the Scheme to another Scheme established by the Fund, or within the Scheme from one Plan to another, which is available for investment at that time. This option will be useful to Unitholders who wish to alter the allocation of their investment among the Scheme/Plan(s)/Options of the Fund in order to meet their changed investment needs.

The switch will be effected by way of a redemption of Units from the Plan/Option and a reinvestment of the net redemption proceeds in the opted Plan/Option of the other Scheme and accordingly, to be effective, the switch must comply with the redemption rules of the switching-out Scheme and the issue rules of the other switching-in scheme (for e.g. as to the minimum number of Units that may be redeemed or issued, exitload,stamp duty, taxes etc). The price at which the Units will be switched out of the Scheme/Plan/Option will be based on the Repurchase Price, and the proceeds will be invested in the opted Plan/ Option of the target Scheme at the prevailing terms and sale price for units in that scheme/plan/option. The switch - out from one scheme to another scheme (i.e. requiring change in portfolio) will be effective only after the switch - out scheme has received the funds in the in-scheme. Accordingly, the applicability of NAV will be dependant on the SEBI guidelines.

Subject to necessary approvals (if any) from the Regulatory authorities and any other approval as applicable, tax deduction at source, if any, will be effected at the appropriate rate in case of a switching by NRIs/FPIs and the balance amount would be utilized to exchange units to the other Scheme.

With effect from January 1, 2011, it is mandatory in case of all the investors (Individual/ Non-Individuals) to be KYC Compliant, irrespective of the amount of investment except in the case of Micro SIPs.

Joint Holders: Joint holders (including first, second and third if any, are required) to be individually KYC compliant before they can invest with any Mutual Fund. e.g. in case of three joint holders, all holders need to be KYC compliant and copies of each holder's KYC Acknowledgement must be attached to the investment application form with any Mutual Fund.

The Minor, upon attaining majority, should immediately apply for KYC compliance in his/her own capacity and intimate the concerned Mutual Fund(s) with all the folio details, in order to be able to transact further in his/her own capacity.

Power of Attorney (PoA) Holder: Investors desirous of investing through a PoA must note that the KYC compliance requirements are mandatory for both the PoA issuer (i.e. Investor) and the Attorney (i.e. the holder of PoA), both of whom should be KYC compliant in their independent capacity and attach their respective KYC Acknowledgements while investing.

For transmission (In case of death of the unit holder): If the deceased is the sole applicant, the claimant should submit his/her KYC Acknowledgement along with the request and other relevant documents to effect the transmission in his/her favour.

Implementation of the Prevention of Money-laundering (Maintenance of Records) Second Amendment Rules, 2017 with respect to seeding of Aadhaar number:

These Rules have come into force with effect from June 1, 2017. 2. It is mandatory for intermediaries including mutual funds to carry out In-Person Verification (IPV) of its new investors from the Effective Date. The IPV carried out by any SEBI registered intermediary can be relied upon by the Mutual Fund. The AMC or NISM/AMFI certified distributors who are KYD compliant are authorized to undertake the IPV for Mutual Fund investors. Further, in case of any applications received directly (i.e. without being routed through the distributors) from the investors, the Mutual Fund may rely upon the IPV (on the KYC Application Form) performed by scheduled commercial banks.
3. Once the investor has done KYC as per the revised process with a SEBI registered intermediary, the investor need not undergo the same process again with another intermediary including mutual funds. However, the Mutual Fund reserves the right to carry out fresh KYC of the investor.
4. The AMC reserves the right to reject application forms for transactions in units of the Mutual Fund not accompanied by letter/ acknowledgement issued by KRA. The KYC compliance status will be validated with the records of the KRA before allotting units.
5. Existing KYC compliant investors of the Mutual Fund, who have completed the KYC process prior to January 01, 2012, can continue to invest as per the practice prevalent prior to the effective date. However it will not be applicable for investments in securities market..

Note: The above change in relation to KYC process shall be applicable in respect of all investment applications (including MICRO SIP) by new investors made on or after January 01, 2012.

All investors (Individuals or Non Individuals) who wish to make an investment in a mutual fund scheme through purchase or switch via a Lumpsum amount or via a Systematic Plan (SIP/STP) (including MICRO SIP) will be required to complete the KYC process. KYC application and necessary documents as set out in the form should be submitted along-with Financial Transactions to any branch of the AMC. The KYC form after completion of IPV process can also be submitted to the Investor Service Centre of Registrar & Transfer Agent along-with Financial Transactions.

- Individual (including NRI / PIO) & Non Individual investors will have to produce Proof of identity, Proof of Address and other mandatory documents as set out in the KYC Application Form.

The documents can be attested, by the Consulate office or overseas branches of scheduled commercial banks registered in India. A PIO, in addition, will also be required to submit a certified true copy of the PIO Card.

The documents submitted as per the above process by the investor to the Point of Service of the Intermediaries would be forwarded to the KRA. The KRA on receipt of documents from Intermediaries would send a confirmation to investors.

Once the investor has completed the KYC process as per the revised guidelines with a SEBI registered intermediary from any KRA, the investor need not undergo the same process again with another intermediary including Mutual Funds. However, the Mutual Fund reserves the right to carry out fresh KYC of the investor. The investor needs to produce a copy of the confirmation letter received from KRA when investing for the first time with a Mutual Fund for fresh investments or additional purchases in an existing folio as per the aforesaid requirements or till his KYC status is updated successfully as per the new revised KYC norms.

Existing KYC compliant investors of the Mutual Fund, who have completed the KYC process prior to January 01, 2012, can continue to invest in Mutual Fund schemes as per the current practice i.e. by submitting along with their Financial Transaction the KYC acknowledgement issued prior to January 01, 2012 by CVL on behalf of all Mutual Funds. However it will not be applicable for investments in other securities markets. These investors, in case they wish to deal with any SEBI registered intermediary other than mutual funds, will have to follow the new KYC procedure.

An existing investor can inform the Mutual Fund to update the KYC Acknowledgement against all the folios/accounts held by him with the respective Mutual Fund. However, each of the holders in these folios/ accounts should be KYC Compliant. Applications Forms / Transaction Slips not accompanied by KYC Acknowledgement / Confirmation letter are liable to be rejected by the Mutual Fund and no transactions, other than redemption, will be permitted. Investors are advised to complete KYC process through KRA at the earliest.

Further, in order to ensure that the unitholder receives all communications, including redemption requests, at the new address, investors are also advised to forward any request for change of address only to same POS/ intermediaries sufficiently in advance of any transaction with the Fund House. Investors holding erstwhile MIN/ KYC Compliance Acknowledgement and who have since changed their address with KFin are requested to approach POS /KRA and complete the process stated above. Kindly note that the Mutual Fund, the AMC or the Trustees shall not be liable in case the investor does not follow the above procedure for change of address or the earlier address continues to be in the Registrar's database. AMC or its Registrar will update change of address requests of KYC compliant investors based on the data provided by KRA and will not be responsible for non-updation if not received sufficiently in advance of any transaction.

Investors are advised to approach the same POS/ intermediaries from where the KYC acknowledgement was issued in case they wish to rectify any data entry mistake by POS/KRA.
